

A Simple Beamer Knitr Example

Guy Yollin

July 1, 2017

Beamer slides can have code chunks

Slides with code chunks need to be marked as "fragile"

```
> set.seed(1)
> x <- rnorm(100)
> mean(x)

[1] 0.1088874
```

A graph from R

```
> plot(cars$dist ~ cars$speed, pch = 16,  
+       col = 'orange', main = 'Distance vs Speed')  
> library(gridGraphics)  
> grid.echo()
```
